THE NEXT HORIZON:

INTEGRATING AI, KNOWLEDGE, INNOVATION AND TALENT FOR SUSTAINABLE GLOBAL DEVELOPMENT

28, 29 & 30 October 2026
Santiago de Chile

CALL FOR PAPERS!
SUBMISSION DEADLINE JUNE 8, 2026

We are living a decisive moment. The convergence of artificial intelligence, knowledge, innovation, and talent is transforming how we understand development, competitiveness, and collective well-being. More than a technological revolution, this is an inflection point that invites us to rethink how we want to build the future.

The real challenge is not only to develop new capabilities, but to guide that progress with judgment, ethics, and a clear sense of purpose. Today, more than ever, we need to open meaningful conversations about sustainability, governance, inclusion, and the role of knowledge in creating more resilient and equitable societies.

In 2026, ICKM, CIKI, and GFIC will convene in Chile, bringing together researchers, professionals, business leaders, public policy decision-makers, and graduate students in a space for interdisciplinary dialogue on the key issues shaping the next frontier of global development. It will be an opportunity to share ideas, challenge perspectives, and explore how artificial intelligence and innovation can generate sustainable impact across sectors and contexts, with particular attention to the voices of emerging economies.

CALL FOR PAPERS!

SUBMISSION DEADLINE JUNE 8, 2026

ABOUT

The Next Horizon: Integrating AI, Knowledge, Innovation and Talent for Sustainable Global Development

Date: October 28–30, 2026
Location: Universidad de Santiago de Chile

The CIKI–ICKM–GFIC Triple Conference 2026 is a premier international event that brings together leading academics, researchers, professionals, and organizational leaders at the forefront of knowledge management, intellectual capital, innovation, artificial intelligence, and sustainability.
Designed to foster high-level dialogue and meaningful exchange, the conference offers a dynamic format that combines scientific rigor with active participation, enabling direct interaction between research and practice. It is a space where ideas are not only presented, but challenged, connected, and transformed into actionable insights.

This unique gathering is the result of a strategic collaboration between three globally recognized academic communities: the International Conference on Knowledge and Innovation (CIKI), the International Conference on Knowledge Management (ICKM), and the Global Forum on Intellectual Capital (GFIC). The 2026 edition will be hosted by the Universidad de Santiago de Chile.
Building on the legacy of previous editions (see GFIC 2025), this conference convenes experts from around the world to engage in critical conversations on the challenges shaping individuals, organizations, and the sustainable development of nations.

CIKI–ICKM–GFIC 2026 offers a unique opportunity to understand the defining issues of the 21st century through the voices of those leading them—researchers, industry leaders, policymakers, and entrepreneurs—across diverse sectors and disciplines.
